Message from our Organisers

Biotech Stage was created to link various biotech professionals at one place to promote an easy and constructive flow of scientific discussions, troubleshooting, and shared individual learnings.

During the 2nd conference, we covered various aspects of biotechnology ranging from upstream work, process development, and scale up leading to manufacturing. We also covered facility design, current GMP regulations along with the issues on patents and regulatory challenges. While 1st day had a combined sessions, 2nd day had two tracks- one of Cell/Gene Therapy and another one on mAbs/Proteins. Both days we had different companies exhibiting their capabilities and products.

We thank you again for your interest in the conference. We intend to provide you details on the conference in this document.

We hope to see you at our next conference in April 2026. We will strive to ensure you will have a fruitful experience at our conference.

Thanks

*Arun Singhal, Ph.D., MBA
Founder and CEO*

Testimonials... contd.

"...This has been an excellent conference. This is the 2nd time we are attending. This is the one place I would like to return back again for more scientific discussions, for one to one candid talks, and lot more interaction...I have seen lots of genuine talks happening over here.. very well organised... There was no delay ... everything is well on time ... I really enjoyed my time over here... I look forward for continued collaboration..."

***Prerna Sood,
SGS, India***

"... It is a really intimate event...It has taken care to address scientific requirements from the industry and good group of people looking to address scientific concerns. We had great panel discussions and I was honored to be part of the panel and I really hope this event takes off to greater heights and more and more good scientists attend this in future..."
